

SMART iFob

The perfect choice for convenient contactless applications

The SMART iFob is a small and robust contactless solution well suited for access control, payment, loyalty, public transport and secure identification applications.

Equipped with a hole, the product can be appended to the bunch of keys or other attachment to items with ease thus providing enhanced user convenience.

Designed for daily use and made of ABS and TPE, the iFob from Earlsmere is characterized by surface hardness, water-resistance (IP67), high impact resistance.

The SMART iFob can be easily adapted to client specific designs with the option to be manufactured in custom colours and to print a logo on its surface.

The SMART iFob is available with serial number, as LF and HF product as well as with various integrated circuit technologies.

Specification

Overview

Operating Frequency

125 kHz / 13.56 MHz

Operating Temperature

-35°C to +80°C

Options

- Print:
- Logo (50.000 pieces or more)
- Custom Colour (50.000 pieces or more)
- Serial number

Programming

Initialization upon request

Applications

- Access control
- Audit for issuing Tools and Equipment
- Loyalty programs
- Public transport
- Secure identification

Benefits

- Reliable
- Convenient
- Durability and high impact resistance
