

# Earlsmere HandyTag

## *the smart and easy identification solution*

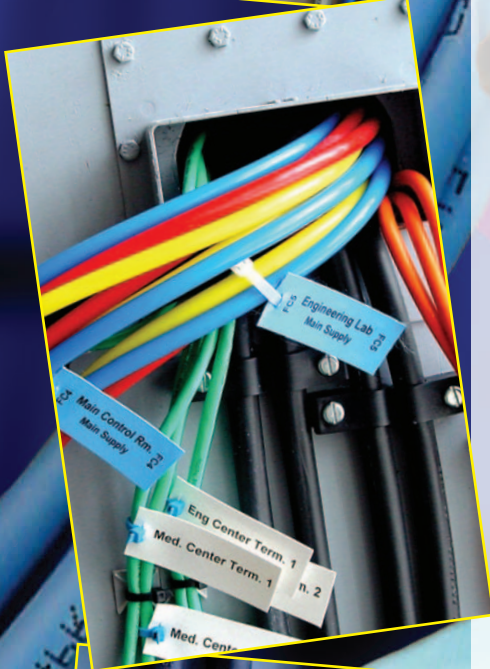

The new **Earlsmere HandyTag** range offers strong abrasion, water, oil and UV resistant tags and labels, which in most industrial environments are almost indestructible and very fit for purpose. As an alternative to paper, card and other lower performance materials, the **HandyTag** range provides an affordable, quick and smart way to solve those difficult identification problems.

Pre-slit attachments, punched holes, strong adhesives, and other fastening options, the **HandyTag** range provides trouble free and easy fixing to most objects using standard tie wraps, metal fasteners, staples or similar fixing methods or by aggressive and permanent adhesive. With a standard range of colours available, and additional ones on request, the **Earlsmere HandyTag** range can be used on most thermal transfer printers and many can be marked with conventional permanent marker pens.

The HandyTag range is a smart solution for identification across wide ranging and diverse industry sectors, including:

- Automotive and aviation
- Baggage tags
- Barcoding
- Bulk wiring projects including network cabling
- Component tagging
- Factory wiring and telecom installations
- HAV warning tags
- Health and safety warning
- Heating and ventilation ducting
- Horticultural tags
- Maintenance and lock out tags
- Marine and railways
- Mining and underground applications
- Offshore oil industry
- Offshore support vessel maintenance and rewiring
- Pallet identification
- Permanent or semi-permanent wire marking
- Petrochemical industry
- Pipe and cable marking (both surface and sub-surface)
- Service pole tags (electricity/telephone etc)
- Subway and mass transit
- Shipping containers
- Survey tags
- Transport cages
